

# **Modern teams need** centralized communication and project management

Managing projects has become increasingly complex, whether it is the number of projects, the diversity of project needs, or the availability of project management tools. Employees are struggling to collaborate and manage projects remotely, leading businesses to adopt a variety of technology solutions that may not work well together.

000

### Unify project and portfolio management in Microsoft Teams

Combine the power of Microsoft Project for the Web and Microsoft Project Online with Microsoft Teams to create a centralized and seamless project and work management experience.

### Simplified project management

### **Greater project** context

- Manage scheduling in one place
- Centralize learning and knowledge bases
- Easily surface complete project metadata
- Input issues into a unified system for visibility
- Consolidate risk-tracking across projects
- Seamlessly update projects
