

Overcome Project Management Complexity and Extend the Power of Microsoft Teams

Transform your Teams experience with an intelligent collaboration toolset for modern project and work management. Help your team or organization unlock the full potential of Microsoft technologies across a variety of workstreams.

Challenges

Today, collaboration is happening in real time, but the project and work management that govern it stand apart from the actual work that is taking place. Formal project and work management roles address critical issues, but their toolset provides limited collaboration capabilities. Nontraditional project and work management roles are managing significant work and making decisions without visibility through the organization.

Innovative-e can help customers accomplish more with Microsoft

Centralize project and work management

Integrate with Microsoft Teams to keep company efforts and information consolidated.

Modernize cloud-based collaboration

Empower everyone to easily participate however required in all project and work management.

Drive decisions from valuable insights

Optimize business decisions across your organization with real-time insights.

5 signs that Innovative-e can help

- You want to migrate to the cloud and modernize legacy project management
- You want to leverage existing Microsoft investments
- You want a holistic view of the work being done
- You want to unlock the value of digital transformation
- You want the benefits of modern collaboration tools

72%

of US executives are planning to invest in tools for virtual collaboration to support hybrid work

[PwC's US Remote Work Survey, January 2021](#)

Drive Microsoft product growth with Innovative-e

Leverage Microsoft products in key projects within organizations and drive adoption of tools like Microsoft 365, PowerApps, Teams, and Project with a Teams-centric project management toolset that connects you within the Microsoft ecosystem.

Unlock these benefits

Empower your organization's best ideas, key insights, and strongest work

Transform project and work management into a competitive advantage with a cloud-based modern collaboration toolset that engages everyone in their core objectives. Empower your organization/team with technology that enables collaboration without constant maintenance and improves PM capabilities throughout their organization. The outcome is access to valuable knowledge and insights from project and work management to make informed decisions that advance their business.

Enable PM functions organization-wide

Consolidate and migrate PM to the cloud

Transform Teams into a unified PM hub

Make data-driven decisions with confidence

Drive collaboration through Teams, anywhere

Modernize legacy processes with automation
